

# Provider Newsflash

A fax bulletin for the Molina Healthcare of Washington Provider Network

## **In-Network Clinical Laboratory Reminder**

(Medicaid, Medicare, Marketplace)

Molina Healthcare of Washington (Molina) would like to remind our providers to utilize in-network clinical laboratory providers. To find an in-network laboratory, visit our Provider Online Directory here: [Sapphire365](http://Sapphire365) ([sapphirethreesixtyfive.com](http://sapphirethreesixtyfive.com))

Quest Diagnostics (Quest) is Molina's preferred in-network clinical laboratory provider. Quest offers numerous benefits to providers, including:

- **Widespread patient access:** Quest has free-standing Patient Service Centers in many locations across Washington; they may also install a drop box in a provider office or send a courier out to pick up samples directly from the office.
- **Extensive testing options:** Quest can perform laboratory testing required to care for Molina's membership, including but not limited to routine medical labs, toxicology and prescription drug monitoring and a wide variety of genetic and other specialized test options.
- **Access to test results:** Providers can access Quest's online tools to order and view test results. Quest provides Molina with direct access to Molina members' test results, which helps to alleviate year-end HEDIS® record audits at the provider office. Quest also offers an online platform to give Molina members direct access to their test results.

Please visit [www.QuestDiagnostics.com](http://www.QuestDiagnostics.com) or call (866) 697-8378 to learn more about Quest's testing offerings and variety of options available to your practice.

Thank you for continuing to serve Molina members!
